

Stop Chronic Pain Now!

Use **Nyloxin** and get moving.

The newest treatment for moderate to severe chronic pain, *Nyloxin* is all natural, non-narcotic and non-addictive. In Clinical Trials it has been proven to be safe and effective while not impairing cognitive function. Each bottle provides up to 60 days of relief.

Why is *Nyloxin* different from other pain medication?

Narcotics reduce pain by altering brain chemistry, causing uncomfortable side effects and possibly addiction, while common analgesics can adversely affect the kidneys, liver or stomach. *Nyloxin* is different because it reduces inflammation and relieves pain without the high risk of negative side effects. It goes directly into the blood stream to the site of pain, blocking it and soothing nerve endings. And it's safe to use every day.

The Topical Roll-on Gel has no scent or dyes. It's non-sticky, non-staining and glides on easily.

Formulated to relieve:

- Joint Pain
- Neck Pain
- Arthritis Pain
- Pain from Repetitive Stress

The Oral Spray has a pleasant-tasting orange flavor, sweetened naturally with Xylitol — safe for diabetics.

Formulated to relieve:

- Back pain
- Neck Pain
- Headaches
- Joint Pain
- Migraines
- Neuralgia

The Topical Gel has no scent or dyes. It's non-sticky, non-staining and easy to apply to larger areas.

Formulated to relieve:

- Joint Pain
- Neck Pain
- Arthritis Pain
- Pain from Repetitive Stress

“Finally, over-the-counter pain relief that really works.”

How does *Nyloxin* work?

Specialized proteins in *Nyloxin* block the action of acetylcholine, a major stimulating neurotransmitter in the nervous system and activator of the inflammatory pathways. As a result, pain and inflammation pathways are temporarily shut off.

Nyloxin works best when used regularly over time.
